

Give it Some Sole

What's in a bespoke shoe?

Time, heart, passion... and some damn good cobblers.

As the purveyors of bespoke and made-to-measure tailoring in Canada, we knew that if we wanted shoes, they'd have to be a company with the same values as us. One where the quality of the product had to be of the same as the person standing in them.

We found a truly bespoke experience in a Spanish manufacturer that still produces everything by hand with an extensive textile offering. They source the best materials in the world and hire the best cobblers in the world.

Using a combination of classic styling with modern innovation, the full grain leather is stitched, painted, and burnished by hand. When soling their shoes, they utilize a Goodyear welt to guarantee durability, weatherproofing and the ability to resole once worn out. With the right care, your pair can last you a lifetime.

No two pairs will be exactly alike and that's the beauty of bespoke. You choose the materials, the stitch colours, the sole... every component is yours.

We'd be excited to have you in the store and see what you can come up with. Some of our customers' designs are so good, we've featured them in limited edition collections. Check out the most recent one here!
