*SUPPLYING THE WORLD WITH
THE BEST OF CANADIAN AGRICULTURE*

Joining BrettYoung

We've been growing the Canadian seed and agriculture industry for over 80 years.

When BrettYoung began in 1934, our focus was to solve the problems of the modern farmer. That tradition continues today, helping our customers grow the best crops worldwide.

Focused on the belief that community success is our success, we stay true to our humble roots. We're still 100% family-owned, with operations throughout the Prairies.

As we continue to adapt to changing weather and market conditions, we know that solutions can come from anywhere.

*Your voice matters at BrettYoung.
You are the future of Canadian agriculture.*

Working With Us

We're passionate about agriculture like we are about hockey. Not a coincidence they're both original Canadian exports.

Focused on integrity and ethical operations, a career at BrettYoung means you will be a partner in fuelling innovation. Whether you become our next marketer, researcher or future-CEO, we'll help you grow in every way.

Find Your Seed – Our Markets

As needs sprout in the seed and agriculture industry, we continue to research new ways to solve emerging problems.

Wholesale Forage & Turf Seed

What may sound like your old-man's tale, in 1934, we began BrettYoung by hand-harvesting wild grass from roadsides and fields.

Over 80 years later, we now offer an expansive forage and seed catalogue, with exports throughout North America, China and Europe. This division also focuses on studying weather and market patterns.

Professional Turf & Reclamation

We see fields for what they can become. Whether it is a golf course, soccer field or yard, we know this is where friends, foes and families gather. We research cutting-edge technology that best cater to changing weather conditions and usage.

Seed & Crop Inputs

Increasing crop yield; battling catastrophic crop diseases; feeding families all over the world – a day's work at BrettYoung. Even if we find ourselves in a dry growing season, or a wetter one, we make sure crops can thrive in any circumstance.

Contract Seed Production

We believe in the power of relationships. By connecting personally with seed producers, we help them generate stable profits alongside their traditional crops.

SPACE FOR INTERNAL COMMUNICATION (NOT WRITTEN BY JCC)

Diversity, Equity and Inclusion

At BrettYoung, we believe in creating a better tomorrow through the business practices of today. This can be seen in our staffing, partners and livable wages.

By working to create an inclusive environment, we've firmly planted the future of BrettYoung in equality and social change. We lead by example through not just our words but also our actions.
